

# Memo game

PRINT

COLOR IN

CUT OUT

Have you sharpened your crayons?

## Tip:

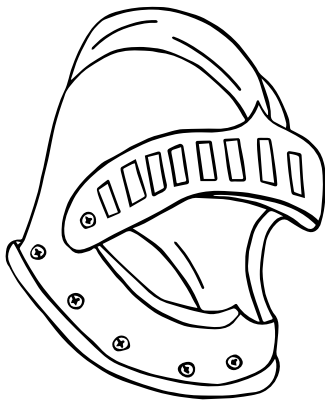

If you glue colored paper to the back, the playing cards will not only be more colorful, but also more stable. But only in one color, of course - otherwise it will be too easy.

## And off you go:

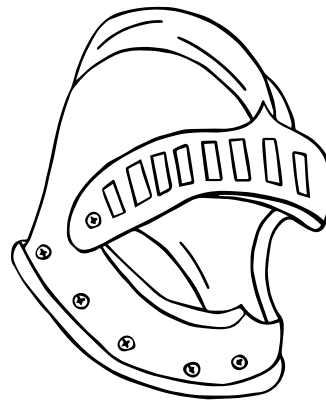

distribute the cards with the picture facing down on the table, turn them over individually and find the double motif with a lot of skill. Anyone who has found a pair can try again. The finder can collect revealed pairs on his own pile and the player with the most pairs wins.

And now: have fun!
